RE: Response regarding question for License renewal file number 0378-EX-CR-2020

With respect to CBRS frequencies 3550-3700 MHz please revise your filing to include the following additional information: 1. Explanation of how it would coordinate any usage with a Spectrum Access System (SAS). 2. Explanation of How it would specifically avoid causing interference to incumbent and commercial operations in the band, including General Authorized Access (GAA).

Nokia Response – We will be using a Nokia SAS or Nokia NDAC equipment with SAS integrated into the unit. Should you have any further questions regarding this matter please let me know.

Yours Sincerely,
Glenn A Steitz
