Subject: Request for Info - File #0184-EX-RR-2010

---

Message:

We have secured a separate STA for the 389-397 MHz frequencies that will be used, so we will amend the application to delete from this application. In addition, we have determined that our current requirements allow deleting several of the other frequencies, and will submit an amendment to the application shortly, including 275.1 MHz. We have 139.975 MHz under review and will be able to address that frequency shortly. Thank you.
