Any update on whether or not Mr. Langfitt needed to obtain the NGT number from the FAA?

John,

The application has been amended to correct the bandwidths, with one exception: the AIS frequency, 162.025, requires greater bandwidth and I think the frequency is not within the narrowband mandate. Please give me a call about this if it is a problem.

With regard to the 1213 MHz frequency, we are still checking that out and will respond early next week. I believe that this is locally assigned to the Navy. Perry Langfitt is determining whether the Navy can locally authorize the use needed. If not, we will initiate the process to obtain an NGT number from the FAA.

Thanks.

Dave

Subject: FCC File #0713-EX-PL-2007

Mr. David Siddall,

Please amend the necessary bandwidths to standard government bandwidths that are less than 12.5 kHz for those frequencies requested in the bands 138-150.8 MHz, 162-174 MHz and 406.1-420 MHz.

Also, please report the NGT number from prior coordination with the FAA Southern Regional Office for the frequency 1213 MHz.

The items indicated above must be submitted before processing can continue on the above referenced application. Failure to provide the requested information within 30 days of February 15, 2008 may result in application dismissal pursuant to Section 5.67 and forfeiture of the filing fee pursuant to Section 1.1108.
