

Application to Modify Experimental License WH2XKP

This application by Northrop Grumman Systems Corporation (NGSC) is to modify experimental license WH2XKP, FCC File No. 0066-EX-CM-2020. The requested modifications are (1) to add four new locations, and (2) to add 14.65 GHz as a mobile frequency, so that three channels – 14.61 GHz, 14.62 GHz, and 14.65 GHz – may be used airborne during experiments.

PLEASE NOTE: If 14.65 GHz is not available, any other single frequency within the range 14.15-14.65 GHz may be substituted so long as there is a minimum of 10 megahertz spacing between it and the two existing authorized frequencies (14.61 and 14.62 GHz).

There are no changes to the stop buzzers for this license.
