**Re: FCC Form 442 Application of Northrop Grumman Corporation
for a New Experimental Radio Service Authorization and a Request for
Confidential Treatment of the Application.**

Dear Madam Secretary:

On behalf of Northrop Grumman Corporation ("Northrop Grumman"), there is submitted herewith, on FCC Form 442, an application for a new experimental radio service authorization under Part 5 of the Commission's Rules.

Northrop Grumman is applying for this new authorization in order to test agile beam radar systems for use in the Block 60 F-16 aircraft, which have been contracted for sale to the government of the United Arab Emirates, and potentially the United States Department of Defense. Because Exhibit I to Northrop Grumman's Form 442 application contains information that has been classified by the United States Department of Defense, Exhibit I will be submitted to the Commission's Security Operations Staff.

Specifically, the information contained in Exhibit 1 has been classified as "Secret" by the Department of Defense's F-16 Security Guide pursuant to Executive Order 12958. This information is exempt from routine declassification pursuant to its X3 status. Accordingly, pursuant to Section 552(b)(1) of the Administrative Procedure Act, 5 U.S.C. § 552(b)(1), and Section 0.457(a) of the Commission's rules, 47 C.F.R. § 0.457(a), Northrop Grumman requests that that Exhibit I be treated as "Secret" for national security purposes and withheld from the public.

Magalie Roman Salas, Esq.
Secretary
Federal Communications Commission
June 19, 2001

Also enclosed is a check made payable to the "Federal Communications Commission" in the amount of \$100.00 to cover the requisite filing fee for the application and the request for confidential treatment.

Any questions concerning this filing may be directed to the undersigned.

Respectfully,

A handwritten signature in black ink, appearing to read "John M. R. Kneuer", with a long, sweeping horizontal line extending to the right.

John M. R. Kneuer
Counsel for Northrop Grumman Corporation
