Dear Sir or Madam:

Northrop Grumman Corporation ("Northrop Grumman") hereby requests a 180-day extension of the grant of Special Temporary Authority ("STA") under Call Sign WB9XMK, which authorizes Northrop Grumman to operate an experimental airborne radar located aboard one of our flight test aircraft based at our Linthicum (Anne Arundel County), Maryland facility. The transmitter operates while in flight at altitudes up to 3500 mAMSL. The area of operation will be within a radius of 320 km of NAD-83 coordinates 39-11-08 N and 076-41-11 W.

Northrop Grumman has been contracted by the United Kingdom's Ministry of Defense's Defense Evaluation Research Agency to continue conducting target data collection flights using a Northrop Grumman experimental radar system. The tests require the radar to be flown over specific types of terrain and targets to produce the necessary data. Our customer point of contact is Dr. Peter Thompson, Phone +44(0)1684 896710, E-mail pthompson@dera.gov.uk

Grant of STA will enable Northrop Grumman to continue to conduct intermittent transmissions during various times of day as required. The radar transmitter will produce 320W of peak power while transmitting, operating within the band 16.2 to 16.8 GHz and therefore an emission of up to 600M00Q0N. The antenna has a gain of 22dB.

The current grant of STA under Call Sign WB9XMK (File No. 0440-EX-ST-2002) will expire on July 18, 2003.

I certify that I am an authorized employee of Northrop Grumman Systems Corporation.

Respectfully submitted,
NORTHROP GRUMMAN SYSTEMS CORPORATION
