

Request for Expedited Grant of the Application

Northrop Grumman Systems Corporation (“NGSC”) respectfully requests expedited grant of the experimental radio station authorization on before May 8, 2006, since the use of the frequency has already been coordinated with Federal government users by AFTRCC (see the AFTRCC coordination attached to this application). The expedited grant of this application is necessary in order to allow the commencement of the testing of the equipment pursuant to a contract with the U.S. Air Force, and will serve the public interest by facilitating the efficient use of time, personnel and equipment .
