SUBJECT: (STA) Special Temporary Authority

To Whom It May Concern:

Thibodaux High School, license owner and Northrop Grumman an agent of the (HLS_ACTD) Homeland Security Advanced Concept Technology Demonstration request the filing of a 180 day (STA) Special Temporary Authority provided on our NMD5-ITFS band A1, A2, A3, and A4 block frequencies, which range from (2.500 GHz to 2.642 GHz in 6MHz alternating blocks). Northrop Grumman expects the flexibility of filing with 180-day options. Any additional time over the 180 days will need to be re-negotiated between Northrop Grumman and the Lafourche Parish School System. Thibodaux High School will remain the owner of the license. The reason for the STA request is to build a safety awareness wireless broadband network for the (HLS_ACTD) Homeland Security Advanced Concept Technology Demonstration.

It is urgent that the STA is completed as soon as possible to meet a system launch deadline, which is on October 4, 2004; however, testing will have to be completed two weeks prior to this date. The STA will have to be approved before any wireless testing can be completed; therefore, this is a time sensitive matter. The superintendent for the Lafourche Parish Public School System, Ernest Reid gave the verbal acceptance of this STA. Due to Hurricane "Ivan", the majority of southern Louisiana including Thibodaux High School has evacuated further inland for safety precautions. After their return an original signed STA authorization from the superintendent will be signed and sent to the FCC. The faxed copy, which is signed by Northrop Grumman and verbally authorized by Thibodaux High School, is submitted first to immediately begin the filing process. Due to the urgency of time for this STA to be approved, it is requested that the FCC accepts the verbal authorization from the high school. The site configurations are listed below:

Site Name: Ellender Hall Dormitory
Coordinates 29 47 26, 90 48 16
NMD5-ITFS Band - A1, A2, A3, A4 Block Frequencies
ERP = 41 dBm
R/C = 80 feet
Antenna Gain = 7dBi
Antenna Model = Maxrad Antennas (Omni)
Site Type = Fixed Site
