Message:

Nimesh,

Yes, I recently discovered that the orbit for this spacecraft, ExoCube-2, has changed. The apogee/perigee is the same, (500kmx500km) but the inclination changed from 90 degrees to 61 degrees.

There are no other changes to the application. I am also prepared to submit the updated spacecap anytime.

We will need to file an extension immediately as well. If it's at all possible to do that in parallel, it would be very helpful.

Thanks
