Subject: Additional Information Request

Message:

In addition to the previous question, please address the following from our staff engineer regarding the radiation hazard analysis.

Thank you for providing your radiofrequency radiation exposure analysis reporting separation distances of 26.40 ft and 59.04 ft for compliance with the occupational and general population limits, respectively. Considering that the possible operating locations appear to include public spaces, please either clarify those operating locations or provide additional details for how operation will ensure the 59.04 ft separation distance for the general population during operation. Note that since the 1997 publication of OET Bulletin 65, specific mitigation requirements for ensuring compliance with the exposure limits have been established in FCC rule part 47 CFR 1.1307(b)(4).

The items indicated above must be submitted before processing can continue on the above referenced application. Failure to provide the requested information within 30 days of May 22, 2026 may result in application dismissal pursuant to 47 CFR § 5.67 and forfeiture of the filing fee pursuant to 47 CFR § 1.1111.
