February 25, 2020

To whom it might concern,

This is an informal objection or inquiry as to why our FCC STA application was only granted for a subset of the frequency band. Special conditions (4) in the grant specifies the limited band to 16.2-16.5 GHz to protect Air Traffic operations. I'd like to inquire on the location of said air traffic operations and if other locations nearby can be found without this limitation.

Thanks,
Eriks
