

EXHIBIT 1

NARRATIVE STATEMENT

Request a one year grant to determine the market potential, feasibility and functionality for new broadband equipment in providing two-way fixed broadband services to schools in Nassau County, NY. It is essential that the potential purchaser of the equipment is able to obtain a realistic view of the system performance for the designated users.

This program of testing will contribute to the development of next generation broadband technology through the demonstration of its capabilities. In addition, it will indicate any areas where further research and development must be conducted to enhance the efficiency and reliability of the product.
