Re: O3b Limited
OET File No. 0221-EX-CR-2019
Call Sign: WH2XRC

This document notifies the Office of Engineering and Technology ("OET") that O3b Limited ("O3b") will begin operating a fixed earth station terminal in Port St. Lucie, FL, on January 24, 2020. The terminal will transmit signals to and from the O3b satellite system pursuant to O3b's grant issued by OET under the above referenced file number and call sign.

O3b will operate a terminal at the below coordinates:

27° 16' 55.8" N 80° 28' 59.0" W

The OET grants authorize O3b to operate up to 10 1.2-meter in the CONUS, Hawaii, Puerto Rico, and the U.S. Virgin Islands and to transmit in the 27.6-28.4 GHz band.

For purposes of this operation, O3b will transmit signals via the terminal to the O3b satellite system in the 27.6-28.4 GHz band. O3b has already completed coordination with terrestrial operators at the above referenced site. Consistent with its application, O3b will notify U.S.-authorized co-channel Ka-band satellite operators seven (7) days prior to transmitting in this band.

Please direct any questions to the undersigned.

Sincerely,

/s/ Will Lewis
