

203 PL 04

Amendment

I got to get a bunch of tower drawings and stuff. As I went through what I have done so far, it kept saying "attach exhibit" describing this or that.

This is a "Weather Research" project called "NetRad" which will utilize Collaborative, Adaptive Sensing of the Atmosphere to predict and detect tornados, jointly supported by the Radar Engineers at UMASS and the Weather Scientist at Univ of Oklahoma and funded by the NSF.

The UMASS guys will have one radar, and Oklahoma will have 4. UMASS already got their license and then asked me to get ours. Their File number is WD2XGC.

As I went through our process, I thought I would capture their exhibits, modify for Oklahoma's installation or create new ones and come back to the FCC application and attach them.

Is there a flaw in my plan?

Thanks millions for your help.

Sorry, cannot use "see WD2XGC:" you need to enter purpose into this application. Just give me a sentence or two to describe purpose (can be via e-mail). That's all that's necessary to complete application at this time (couple of weeks to do what?).

I am still working on the applications. It may take me a couple of weeks to complete. I hope that is ok.

- 1) see WD2XGC**
- 2) 660ns pulses @ 3kHz max**

Need the following information related to your application for experimental license:

- (1) Purpose
- (2) pulse width & pulse repetition frequency/rate

*** Non
