Re: Application By Omni-Point Data Company, Inc.
For New Experimental Radio Station Authorization
And Request To Withhold Information In Exhibit 2
From Public Inspection (47 C.F.R. § 0.459)

Dear Sir or Madam:

Enclosed please find one original FCC Form 442 application, complete with a narrative statement as Exhibit 1, technical information to be withheld from public inspection as Exhibit 2, a Form 155 Fee Processing Form and check for \$35.00 for the Form 442 application, and a separate Form 155 Fee Processing Form along with the required correspondence and check for \$35.00 for the request to withhold the information in Exhibit 2 from public inspection pursuant to 47 C.F.R. § 0.459. The latter request is necessary to protect highly confidential technical data from public inspection until Omni-Point's technology moves beyond the experimental state. This request serves the purposes of the experimental radio licensing process and provides the Commission with information necessary to its evaluation of the above-referenced application.

This application requests authorization for Omni-Point Data Company, Inc. to test a limited number of experimental direct sequence spread spectrum devices that conform to the requirements of Part 15 of the FCC Rules.

Please contact David A. Wormser at (202) 828-1447 or me at the above telephone number with any questions regarding this matter.

Sincerely,

Peregrine D. Russell-Hunter
