To Whom It May Concern:

By way of this letter, OmniMesh Technologies Inc. (OmniMesh) certifies that:

OmniMesh deploys and manages Radio Frequency (RF) equipment;

RF experimentation will be conducted following a strict test plan, defined and approved by OmniMesh in a controlled environment;

OmniMesh will have a project manager in place to specifically follow, track, and publish results of the test plan; and

OmniMesh employees have extensive RF engineering and deployment experience, including numerous RF engineers on staff.

For the above reasons, I believe that OmniMesh meets the eligibility criteria for a Special Temporary Authority experimental license as set forth in the Commission Rules.

Sincerely,

Matt Snyder
