Re: Application By Omnipoint Data Company, Inc. For
New Experimental Radio Station Authorization And
Request To Withhold Information In Exhibit 2 From
Public Inspection (47 C.F.R. § 0.459)

Dear Sir or Madam:

Enclosed please find one original FCC Form 442 application by Omnipoint Data Company ("Omnipoint"), complete with a narrative statement as Exhibit 1, technical information to be withheld from public inspection as Exhibit 2, a Form 155 Fee Processing Form, and a check for \$70.00.

Omnipoint requests that the Commission withhold the information in Exhibit 2 from public inspection pursuant to 47 C.F.R. § 0.459. The latter request is necessary to protect highly confidential technical data from public inspection until Omnipoint's technology moves beyond the experimental state. This request serves the purposes of the experimental radio licensing process and provides the Commission with information necessary to its evaluation of the above-referenced application. This application requests authorization for Omnipoint Data Company, Inc. to test experimental direct sequence spread spectrum devices that conform to the requirements of Part 15 of the FCC Rules.

Omnipoint further requests that the Commission consider these documents to have been filed as of July 30, 1991. The application and exhibits were received by the Commission's Fee Section on that date. The Fee Section, however, rejected the filing because Omnipoint, based on a telephone discussion with

Fee Section personnel, had divided the \$70.00 in fees between two checks.

Please feel free to contact me if you have any questions regarding this matter.

Sincerely,

David A. Wormser

Re: Application By Omnipoint Data Company, Inc. For
New Experimental Radio Station Authorization
(Dated July 29, 1991), File No. 2174-EX-PL-91

Dear Mr. Wright:

I am writing on behalf of Omnipoint Data Company ("Omnipoint") to amend the above-referenced application for an experimental license in accordance with our discussions over the past two weeks. Omnipoint specifically amends its application in the following respects:

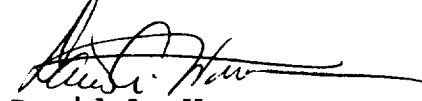

1. Omnipoint seeks authority to operate in the 1850-2200 MHz range.
2. The number of units to be tested in any metropolitan area at any time shall be limited to twenty-four (24) handsets and three (3) base stations.
3. Each test under this license shall be limited to no more than sixty (60) days.
