Hello Michael

Here is some additional information to help complete your application.

You'll need to complete the spacecap filing and send me the database file that is generated. The FCC email will block .mdb and .zip files so just change the file extension to .txt and send that to me. Our International Bureau also asks for a cost recovery and ITU filing letter. They are similar looking but I have attached samples for you. I also have attached a document from the web to help with the spacecap.

Rockie Patterson and Joseph Hill in our International Bureau can help with ITU questions as well. I copied them with this.

As we discussed, if you are slated for a June integration then we would need to get things rolling now.

Regards
Tony Serafini
