Subject: Additional Information Request

Message:

Please find below replies to your comments

- 1) The location will be near Low Mountain, AZ. The application has been amended accordingly.
- 2) That's correct, this STA will involve transmissions to/from the satellite and as such we are also requesting a license for an experimental LEO satellite.
- 3) The satellite is currently planned for launch on a SpaceX rocket on 26 JUN 2021, and will be operated under the authority of Rwanda.
- 4) We would like this experiment to be significantly representative, and that's why we set the upper bracket at 30 units. Having said this, we are happy to bring this number down to 10 units.

Please let us know if you need any additional information.

Looking forward to hearing back from you.

Best,
Omar
