Mr. John Kennedy

John, please consider this an FYI only.

Please see attached, in reference to condition #3 associated with File Number 0471-EX-PL-2007, and the recently granted authorization WE2XKW.

Subject: RE: Experimental license

December 11, 2007

Mr. Harris

A review of the Experimental License Call sign WE2XKW for mobile operation within 15 km, centered around the corrected latitude, coordinates NL 41-02-45; WL 73-57-33, indicates that it will not interfere with the operation of local broadcasters on Broadcast Auxiliary (BAS) frequencies.

Accordingly, please consider that you have completed the requirement, Special Condition (3) of the license, to perform prior coordination with the Society of Broadcast Engineers Inc. (SBE).

Thank you for coordinating with the SBE in a timely manner.

Walter Sidas
SBE Frequency Coordinator, Under 1 GHz
New York City Metropolitan Area.
