Experimental Licensing Branch
445 12th Street, S.W., Room 7A-321
Washington, D.C. 20554

February 12, 2007

Attn: Brad Franco
ORBCOMM License Corp.
2115 Linwood Avenue, Suite 100
Fort Lee, NJ 07024

DISMISSED-WITHOUT PREJUDICE

Dear Brad Franco,

This refers to application, File No. 0106-EX-PL-2006, for an experimental authorization.

You are advised that the Commission is unable to grant your application for the facilities requested. As stated in the Commissions correspondence dated September 29 2006, this request should be filed with the International Bureau as modification to Orbcomm's regular authorization. In addition, because the number of objects surviving reentry can have a significant impact on casualty risk, the modification application should include, as indicated in the Public Notice, DA 04-1724, "an estimate of the number of components/fragments, and their estimated dimensions and mass, likely to survive to the Earth's surface." We would also ask that the modification application state whether there are, besides Orbcomm satellites, any other known space stations, planned or currently operational, in an orbit identical to or very similar to the orbit planned for the new Orbcomm satellite.

Responses to this correspondence must contain the Reference number : 4735

Sincerely,

A handwritten signature in black ink, appearing to read "James R. Burtle", written over a horizontal line.

James R. Burtle
Chief
Experimental Licensing Branch
