Message:

Hello,

Does the NTIA redbook section 8.3.28 apply to our situation? We are not in any way trying to re-transmit the GPS signals. Rather, we need authorization in/near the same frequency band.

Also, we can perform our testing "off frequency" by 13 MHz (for example) from the L1 and L5 frequencies if necessary.

What is your recommendation going forward? Are we still bound by 8.3.28 since our signals will NOT be received from the Global Positioning System?

Thank you.
