

EXHIBIT B

Question 10: Transmitter Manufacturer/Model Number

Satellite

Orbital Sciences Corporation manufactured the OrbView-2 satellite transmitter that operates in the L-band. No model number is available for the L-band transmitter. Motorola manufactured the OrbView-2 satellite transmitter that operates in the S-band. No model number is available for the S-band transmitter.

Earth Station

Marconi manufactured the signal generator for the earth station. The model number is 2041.

Power System Tech manufactured the high power amplifier (50 watts) for the earth station that communicates with the OrbView-2 satellite. The model number for the 50 watt high power amplifier is CHCD29218-50/2741.

Power System Tech also manufactured the high power amplifier (100 watts) for the earth station that communicates with the OrbView-2 satellite. The model number for the 100 watt high power amplifier is CHCD29218-100/4423.
