"MODULATING SIGNAL DESCRIPTION"

For complex emissions, submit an exhibit describing in detail the modulating signal and indicate the frequency range that it is associated with.

Answer:

System is working at OFDM and using BPSK, QPSK, Qam16 and Qam64 modulation types.

- Frequency in use: 4950-4990
- Channels width: 10Mhz or 20Mhz all within the range of the frequency in use.
