Subject: Conventional Modification

---

Message:

Hi Nimesh - Thank you for follow up correspondence. I am currently unable to modify the previous Callsign WJ2XGU because the application expired on 02/01/2019. The Error Page indicates that "Callsign WJ2XGU expired on 02/01/2019. You may not request modification to this license."

Should I request a License Renewal through Form 405 and note changes in the frequency and ERP value there? Once the renewal is submitted, it looks like I will be able to subsequently request a modification to that Callsign as well. If this is incorrect, can you provide me other possible next steps?

Thank you in advance for your guidance.
