FEDERAL COMMUNICATIONS COMMISSION
OFFICE OF SECRETARY

Re: Station KM2XEN
File No. 3072-EX-R-94

Dear Mr. Wright:

Pursuant to Condition 3 of Station KM2XEN's experimental license, which was granted on August 10, 1992, and renewed on July 1, 1994, this constitutes the tenth of our quarterly reports regarding the progress of the authorized experimental PCS operations.

Paramount Wireless Limited Partnership (PWLP) has continued conducting PCS analytical studies and experiments pertinent to the commercial implementation of PCS on a large scale basis.

Our continued studies and experiments include the following:

1. Continued research pertinent to 2 GHz PCS implementation including PCS network architectures and service schedules
2. Preparation of patent applications
3. Financial modeling based on Local Exchange Carrier (LEC) "unbundled" blind assumptions
4. Formation of entrepreneurial company to hopefully participate in "Designated Entity" PCS auctions
5. High level discussions with Regional Bell Operating Company (RBOC) in relation to future testing, etc.
6. Continued dialogue with equipment vendors under non-disclosure agreements.

The knowledge acquired from the described studies and experiments contributes to what PWLP believes to be a unique vision of PCS as it applies to "competition in the local exchange" from both a wireless and wireline perspective. PWLP has conducted research on PCS and "competition in the local exchange" concurrently and has developed important insights to the inter-relations of these catalysts of industry restructure. The most important insights are that these two catalysts are working toward the same end and that PCS cannot exist without "competition in the local exchange".

Mr. H. Frank Wright
