

Pathfinder Technology Inc is under contract to US Special Operations Command to conduct advanced research and development into two new technologies for possible implementation on the AC-130U gunship. These technologies are non-cooperative target identification (NCTI) and Passive Acoustic Reflection Device (PARD). These two technologies are enabled through the AN/APQ-180 gunship radar system. In order to perform laboratory tests of articles developed for this program a low-power x-band radar system is required. Program name: Advanced Target Identification and Covert Communications (ATICC-II). USSOCOM Program Manager: Mr. Sal Strano, (813) 839-3794, 2909 West Bay to Bay Boulevard, Suite 408, Tampa, FL 33629; stranos@rnd4sof.com. Contract Number: GS23F-0397P/W9124Q-05-F-1118.
