Message:

Your note indicates that this system is limited to 2.43W ERP. That equates to 33.86dBm. The input power of 12.6mW (11dBm) corresponds to an ERP of 36dBm (3W, not 2.43W) when the 25dBi antenna gain is added. Can you confirm that the maximum should be 12.6mW/3W rather than 12.6mW/2.43W per 15.407(a)(4)?
