Subject: Additional Information Request

Message:

- Stating data is transferred over an "unknown signal" while citing the IEEE 802.11 standard is very confusing.
- IEEE 802.11 utilizes multiple spread spectrum techniques across multiple ISM channels. Based on this, NTIA believes that the best recommendation is to change the X to a 7 which is "Two or more channels containing quantized or digital signals."
- Do you agree to the change from 20M0W XD to 20M0W 7D?

The items indicated above must be submitted before processing can continue on the above referenced application. Failure to provide the requested information within 30 days of March 15, 2019 may result in application dismissal pursuant to Section 5.67 and forfeiture of the filing fee pursuant to Section 1.1108.
