Date: September 15, 2020

Subject: Application for Renewal for WJ2XTP, file number 0518-EX-CN-2018

To Whom It May Concern,

Persistent Systems, LLC ("Persistent") has been making steady progress in radio design and development under the current grant WJ2XTP which is set to expire November 01, 2020. This grant has afforded Persistent to make significant improvements to the product offering for several new and existing US Government customers including several Prime contracts. Specific contracts include support to the following customers:

AF Global Strike Command WaRTAK POR: FA8204-18-C-0003  
AFRL: FA8650-20-P-9204 and FA8650-19-C-9203  
USSOCOM: W911QY-14-D-0016  
US Army: W56KGU-20-C-0001

In addition to these contracts Persistent has also been awarded several new Programs of Record with US DOD customers, including major programs with the US Army for Ground Robotics, Unmanned Air Systems, and Subterranean programs. Persistent is also working on technical testing and development with US DOD Research and Development labs (CRADA No. C5ISR 19-ST-04) that continue to refine requirements and delivery to DOD customers. Persistent supports various Federal customers to include DHS, FBI, NYPD among others.

It is our desire to request a renewal for the grant so that we can continue to support our Government customers. Over the past two years, Persistent has been able to continue these endeavors with zero notifications to date that any interference in local operations has occurred. Persistent respectfully requests a 2 year extension on our current grant.

Best regards,

/S/
