

Modification of Dove 4 Experimental License

This is a proposed modification to the current license for the Dove 4 experimental satellite.

Current license: 0551-EX-PL-2012

Call Sign: WG2XKX

The modification requests to move the X-band center frequency to 8133 MHz and to increase the maximum occupied bandwidth to 66 MHz. This will allow testing of the latest capabilities of the experimental X-band transmitter.

No other changes to license are requested.

Current launch date for Dove 4 is November 21, 2013 on the Dnepr rocket.
