Dear Sirs:

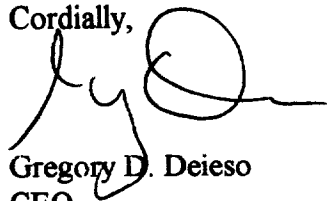

Please consider this as our 6-month progress report for our experimental license, Call Sign KF2XBF, File Number 3735-EX-PL-93, in accordance with the license granted in September 1993.

To date, we have experimented with the use of this license at one location. We conducted a test on January 31, 1994 in Atlanta, Georgia, inside the Georgia Dome.

We tested various open FM frequencies in the Atlanta, Georgia area. Four watts of (ERP) power were used during the test.

The emission did not leak outside the perimeter of the structure due to low power limitations. The test lasted approximately 2 hours and the reception was considered excellent.

Cordially,

Gregory D. Deieso
CEO

GDD/rc
