Subject: FCC File # 0344-EX-PL-2005

Message:

Dear Mr. Wayne Pleasant:

Why can't this point-to-point link propagation effects test using directional antennas be performed at one fixed location as opposed to requesting the Continental United States? If you find that it is possible to select one or two point-to-point locations, then please report those locations' latitudes and longitudes to the nearest second and the cities and states of those locations.

Why is a five-year experimental license required as opposed to a standard two-year experimental license?

The items indicated above must be submitted before processing can continue on the above referenced application. Failure to provide the requested information within 30 days of February 03, 2006 may result in application dismissal pursuant to Section 5.67 and forfeiture of the filing fee pursuant to Section 1.1108.
