

MODULATING SIGNAL DESCRIPTION (Attachment for File No. 0254-EX-ST-2006)

Modulating Signal:

Frequency Deviation ± 7.5 MHz (linear FM)
Pulse Duration 68 μ S
Repetition Rate 8 KHz

Please note: In previous STA applications it was suggested we use the Frequency Tolerance designator of “**1G50XXX**”.

We wish to use this same value again and have tried to enter this, but the Frequency Tolerance field will apparently not admit non-numeric characters, so we have had to leave this field blank in this submission.
