

**Supplement to Modification Narrative**  
**0272-EX-CM-2020**

The satellite will transmit to the two new earth stations in the 2081.25-2082.75 MHz with frequency range a center frequency of 8496.25 MHz. The output power will be 2.5 W peak with an ERP of 2.31 W peak. The frequency tolerance will be .0001%. The emission designator will be G7W. The necessary bandwidth will be 2.3 MHz. The modulating signal will be BPSK.
