Marlene H. Dortch, Secretary
Federal Communications Commission
Office of the Secretary
445 12th Street, SW
Washington, DC 20554

Dear Ms. Dortch:

The Bay Area Regional Interoperable Communications Systems Authority (BayRICS) is in the process of negotiating with First Responder Network Authority (FirstNet) to lease the 700 MHz Public Safety Broadband Spectrum and D Block Spectrum (Band Class 14) in the San Francisco, California Bay Area. BayRICS intends to build and operate a public safety broadband network in the Bay Area in partnership with Motorola Solutions, Inc.

We are aware that PureWave Networks Inc. (PureWave), a manufacturer of Long Term Evolution (LTE) equipment, seeks Special Temporary Authority (STA) from the Commission to conduct temporary and limited testing of its products on Band Class 14 within BayRICS' anticipated area of operation.

PureWave has agreed to limit its operations and use of the Band Class 14 spectrum to a period of six months and to the geographic area described in the STA application. Based on these limitations, and subject to any additional approvals required by FirstNet, BayRICS has determined that PureWave's application will not cause any interference with BayRICS deployments or use of Band Class 14 spectrum in the BayRICS geographic area.

Please feel free to contact me if you have any questions.

Respectfully submitted,

A handwritten signature in blue ink, appearing to read 'Barry Fraser', is placed above the typed name and title.

Barry Fraser
General Manager
BayRICS Authority
