Subject: FCC File No. 0303-EX-PL-2007

Message:

Dear Mr. Ghaffari,

I believe the following are the correct designators:

510-1710kHz NONNNN [Unmodulated carrier wave]

510-1710kHz 500HG0N [500Hz BW Phase modulation/no data]

510-1710kHz 500HG1D [500Hz BW Phase modulation w data]

We would be using no more than 25 different tag transmitters. Please feel free to contact me if I may be of any further assistance or if any additional information is required.

Best Regards,

Hans
