Subject: RE: FCC File No. 0251-EX-ST-2008

Hi Ben,

Qualcomm owns and is transmitting operational MediaFLO service on channel 55 in San Diego. We have 50kW transmitters deployed around the city that have completed formal OET69 reports through the FCC. This site in the STA is a temporary location to enhance converge for test/demonstration in an area that has limited coverage. Given that Qualcomm is operational on ch55 in San Diego, there should be no transmission other than Qualcomm for SBE to coordinate. Based on this clarification, do I really need SBE coordination?

Thanks,
John
