

November 19, 2007

OET Experimental Licensing:

Qualcomm Incorporated hereby requests consideration for approval of its STA application 0561-ST-2007 that was submitted on November 19, 2007.

The purpose of the STA is to support a demonstration of Qualcomm's innovative MediaFLO technology at the Consumer Electronics Association, which will occur from January 7-10, 2008.

Qualcomm owns a license for the spectrum in Las Vegas (Call sign WPWU989) and although Qualcomm provides commercial service in Las Vegas, this STA is required for deployment of the temporary transmitter during the tradeshow to enhance coverage at the Las Vegas Convention Center. The temporary transmitter needs to be installed prior to the tradeshow and thus requires expedited treatment to ensure the public has optimum MediaFLO performance.

Sincerely yours,

John Forrester  
Qualcomm Inc.
