Subject: **Request for Expedited Processing of FCC Form 442 Applications**

Reference: Nancy Hey Letter of 3/15/2000, Acknowledging Applications Receipt
on 3/8/2000

Dear Mr. Burtle:

This letter is to request expedited processing of the following applications submitted by
Mr. D. Larry Best of our office:

<u>Location</u>	<u>File Number</u>
Shallow Water Platform M0990	0061-EX-PL-2000
Mid-Buoy Platform MP162	0062-EX-PL-2000
Deep Water Platform MC809, URSA	0063-EX-PL-2000
West Delta Platform WD029	0064-EX-PL-2000
State Route 180/Dixie Graves Parkway	0065-EX-PL-2000
Breton Island Platform CA025	0066-EX-PL-2000

As noted in the documentation we submitted, our applications are in support of the Breton Aerometric Monitoring Program, an environmental data collection field program being implemented in response to requirements of the Minerals Management Service (U.S. Department of the Interior). In order to meet the objectives of this program, it is important that data collection field operations begin by early May 2000. We would therefore greatly appreciate your expedited processing of our applications so that we may receive the needed authorizations by 5 May 2000 if possible.

Thank you for your consideration of this request, and for whatever help you can provide in expediting the processing of our applications.

Sincerely,

Gary S. Zeigler
Operations Manager
Meteorological Systems and Services
