Re: Assignment of Authorization, Mass Filing

You will please find enclosed one completed copy of FCC Form 442, Application for Assignment, with the required FCC license processing fees, **\$765.00 (17@ \$45.00)**, attached. This filing is being submitted by the **Lockheed Martin Corporation** as a result of the recent acquisition of the **Loral Corporation and a majority of its subsidiaries**, completed on April 23rd 1996. We currently have Special Temporary Authorizations on file, submitted on April 18th and approved on April 19th, 1996, for all radio station authorizations affected by this acquisition. These STA's will cover operations of all systems until final approval of the attached applications by the FCC.

This filing is being submitted as part of a Mass Filing at this time due to the size and complexity of this acquisition and the overall number of radio station authorizations involved. All administrative data has been updated to reflect the new licensee, **Lockheed Martin Corporation**. Since all technical data for the affected licenses remain unchanged, it is understood no further action is required at this time.

You will also find attached a statement filed previously by the Loral Corporation in regards to the assignment of radio station authorizations previously assigned to a Unisys subsidiary acquired and assigned to the Loral Corporation. This document was a statement citing prior criminal charges filed against both the Loral Corporation and Unisys Defense Systems. It is understood that this document was submitted for your review in response to various items on different FCC application forms and has been determined not to affect the prior assignment process. It is submitted here disclosure purposes and your information.
