Subject: Raysat Antenna Systems, LLC - Experimental STA - File No. 0327-EX-ST-2007 - Satellite Points of Communication

Importance: High

Ben,

You had asked that I confirm the satellite points of communication for the Raysat Antenna Systems, LLC (RAS) experimental STA request (File No. 0327-EX-ST-2007). As we discussed, the prior experimental governing these operations did not have specific satellite points of communications listed, so we did not include them in the STA request.

In any event, the satellite points of communication include:

AMC-6 at 72W
SBS-6 at 74W
AMC-5 at 79W
Galaxy 28 (formerly Intelsat Americas 8) at 89W
AMC-4 at 101W
Horizons 1 at 127W
Galaxy 27 (formerly Intelsat Americas 7) at 129W
GE-23 (formerly AMC-23) at 172E

The off-axis e.i.r.p. levels associated with RAS's experimental operations (which are, of course, conducted on a non-harmful interference basis) have been coordinated with satellite operators within +/-6 degrees of these satellite points of communication.

Please let me know if you have any questions regarding the foregoing or any other issue related to this application.

Best regards,

Carlos
