

Raytheon Company (Missiles & Defense – M)
Experimental License Application
File Number: 1047-EX-CN-2020

Supplemental Exhibit – Time of Use

Raytheon has submitted an application for demonstration of a combination of radio systems. To facilitate the review of this pending application, the team that will be conducting the demonstration has provided additional information.

There will be a demonstration in April 2021. That demonstration will be for the US Army. It will take place on one day only. During the demonstration, the data link radio will be in use for one minute (60 seconds) of the demonstration. The seeker radio will be in use for only 10 seconds.

The demonstration will be coordinated with other operations at White Sands Missile Range, because there is a telemetry system that also needs to be used as part of the demonstration. The telemetry system is the subject of a separate application: 0232-EX-ST-2021.

Should there be any further questions about these operations, please contact Jim Ortega at 520-794-0227 or james.e.ortega@raytheon.com or Anne Cortez, WFS, at 520-360-0925 or alc@conspecinternational.com.
