Below are statements addressing items (1) through (9) of 47 CFR 0.459(b):

- (1) Identification of the specific information for which confidential treatment is sought;
 - The application contains data such as power level, antenna location, duty factor, pulse width, and modulation type that is considered sensitive export controlled information per direction of the United States Air Force (USAF) customer.
- (2) Identification of the Commission proceeding in which the information was submitted or a description of the circumstances giving rise to the submission;
 - An experimental license is being requested to conduct developmental testing and demonstrations.
- (3) Explanation of the degree to which the information is commercial or financial, or contains a trade secret or is privileged;
 - The information is privileged as export controlled because it identifies key radar design parameters sensitive to the USAF customer.
- (4) Explanation of the degree to which the information concerns a service that is subject to competition;
 - The information is important to the USAF customer and their mission as it relates to the current and future products we are developing.
- (5) Explanation of how disclosure of the information could result in substantial competitive harm;
