

Reference: FCC experimental license WD2XKJ (FCC File # 0143-EX-PL-2004).

Condition 2 of the license calls out US Navy contract number N00019-84-C-0569. That contract number has changed.

Currently, Raytheon Missile Systems is working on over 50 contracts and several Raytheon funded IR&D programs. Most of those contracts are with the DoD, however we are also supporting DHS, DoT and DoJ and several other federal and local agencies.

The Raytheon funded IR&D programs do not have a contract number but they do require GPS Re-Rad systems for GPS Receiver testing.

The following contract numbers require the use of GPS Re-Rad systems to test out our GPS Receivers: A-49228A, F08635-03-C-0002, F34601-02-C-0090, F42630-01-C-0025, F42630-99-D-0288, FA8520-04-D-0004, FA8675-04-C-0001, FA8675-05-C-0070, FA8681-05-C-0075, N00019-00-C-0135, N00019-04-C-0569, N00019-95-C-0120, N00024-00-C-5401, N00024-02-C-5421, N00024-04-C-5342, N00024-06-C-5350, N00024-98-D-8124, and W31P4Q-06-C-0032.

These contract numbers change from time to time and we will make every attempt to update this list when it changes.

We request that the license be modified to encompass these contract numbers as well as our Raytheon funded IR&D programs that we hope will become contracts in the near future.
