

Exhibit 2

Raytheon Missile Systems Experimental License Application
0156-EX-PL-2010

Additional Information Regarding Government Contract

Raytheon Missile Systems is submitting this additional exhibit to its pending experimental license application, 0156-EX-PL-2010. This exhibit provides information regarding a government contract that requires the use of the Outdoor Antenna Test Range, particularly in the frequency ranges of 225-328 and 335 to 399 MHz.

- Contract Name: AMRAAM
- Contract Number: FA8675-06-C-003
- Point of Contact: Paul Garvey, 850-883-0255
- Stop Buzzer: 520-794-0875

The stop buzzer telephone number goes to the control room for the outdoor antenna test range. If the range is in operation, the control room is staffed, the number will be answered, and the person answering the phone will be able to shut down the transmitter. If there is no answer, then the outdoor antenna test range is not in use, because the control room is always staffed if the range is in use.

For any questions about this application, please contact Tom Fagan, Spectrum Manager, Raytheon Missile Systems, tjfagan@raytheon.com, 520-794-0227 or Anne Linton, alc@wfsllc.biz, 301-980-2335.
