

Hi Anne,

With all the mitigating factors very low duty cycle, very low power at 100 mW, and use inside an Anechoic Chamber yielding a very low radar link budget below noise level, we concur with the following Coordination Serial numbers. My thanks to you and Andrew again with his corrections below to facilitate this process very much.

SER	XSC	XAL	FRQ
NG T120417	AZ	TUCSON	2700-3000 MHz
NG T120418	AZ	TUCSON	5000-5250 MHz
NG T120419	AZ	TUCSON	9000-9200 MHz
