

# **SR Hawk Radar FCC STA License Request**

## **1 Purpose of Operation**

Raytheon Network Centric Systems (NCS) to research develop and demonstrate A mobile surveillance system based on commercial-off-the-shelf radar (ELTA Systems Ltd EL/M- 2112 Ground Master) and electro-optical/infrared cameras to monitor international borders.

- File Number: 0426-EX-ST-2011
- Class of Station: MO
- Station Locations: MOBILE
- Effective: 07/15/2011
- Expiration: 01/15/2012

## **2 STA Explanation**

As detailed in paragraph 1 above, Raytheon seeks this STA in order to allow testing and technical demonstrations of this Radar system for mobile surveillance system based on commercial-off-the-shelf radar (ELTA Systems Ltd EL/M- 2112 Ground Master).

RISE TIME (U) 0.7 us (U) 0.6 us (U)                                                                     |  |
| <p>7. Crystal controlled. Two frequency pairs are required for each radar system. The two frequency pairs may be selected from anywhere within the transmitter's tuning range, but must be separated by at least 30 MHz. Each pair radiates two frequencies that are +/- 0.5 MHz offset from the carrier. This results in four frequencies with the emission bandwidths identified in block 12. (See page 12 for additional information.)</p> <p>8/12/18/19. Left column describes non-linear FM (Q3N) waveform, the right column details the simple FM pulse (P0N) waveform.</p> <p>10. Harmonic filter has a 0.12 dB loss in band and an attenuation of 29 dB at the second harmonic.</p> <p>14. The measured bandwidth of the NLFM pulse at the -20 dB point is 1.8</p> |  | d.
