

**SUBJECT: Request for FCC Experimental License for Operation of
Motorola PTP48600 Microwave Radio
FCC File Number 0626-EX-PL-2011**

Request reconsideration of subject license request based on limited tuning range of the Motorola PTP48600 Microwave Radio. The radio is designed to operate in two sub-bands of the 4400-4990 MHz frequency band. The sub-bands are:

Public Safety Band - 4940-4990 MHZ

Federal Extended Band - 4710-5000 MHZ

This tuning limitation does not allow use of the 4400-4990 MHz frequency pairings as listed in paragraph 4.3.18, Table 3, of the NTIA Manual, as the lower frequencies in the Table 3 pairings fall below the equipment tuning range.
