

Hi Ben,

Raytheon AST in Sunnyvale, CA currently have one FCC license (WG2XYC) located at NL 37-22-51; WL 122-02-09. AST will be relocating the antenna associated with this license to a new rooftop facility located at about 500 hundred feet east of the current location.

Reason for relocating antenna: Raytheon AST is moving out of the building where this antenna system is mounted. I am modifying this license to reflect the new location.
